

CANAPE Autumn Newsletter - Looking to the future

As autumn turns the reeds in our fens golden, reflecting the golden autumn sun, it is time for the CANAPE Autumn Newsletter.

We are looking towards the 2nd half of our project, and considering how best to make full use of our outputs. To that end, we are;

- Extending the project to the end of 2022, to make up lost time due to Covid-19.
- Joining with like minded projects such as C-Connects and CARE-PEAT to build on each other's successes and learning.
- Adding an additional pilot site to extend the demonstration of CANAPE products and learning.

The plans for our new site are still under development, but we we will have some exciting news and designs for you soon.

Saving Kett's Oak

We have previously shared our success in creating sustainable charcoal for use on a BBQ. However, in ££s per gram, a potentially more profitable product is biochar. This has use in silviculture, with a range of health benefits for trees. As a trial,

we have donated charcoal to [Norfolk County Council](#) to protect the historic "Kett's Oak."

Talking of biochar, a picture of the creation process (to the right) is a finalist in the North Sea Region Photo Contest. If you want to see the CANAPE images, and vote for them, visit the NSR site here.
