

Buyer profile: ABB

In 2016 ABB inaugurated the innovation growth hub SynerLeap, located in the heart of ABB's largest R&D center in Västerås with unique infrastructure and expertise within energy and automation. SynerLeap creates an ecosystem to enable small technology companies to grow and expand on a global market, made possible by sharing the same innovation environment to reduce innovation cycles, decrease time to market and together strengthen the competitiveness.

SynerLeap is now looking for small and medium enterprises in the area of energy and power that are willing to collaborate with ABB, the other SynerLeap companies and our regional partners. To meet the Energy Revolution we are searching for new solutions related to energy efficiency, renewable energy, microgrids, data centers, e-mobility, asset monitoring and diagnostics and power quality among others.

Take the time to discuss with Magnus Backman, Head of Energy and Power at SynerLeap, to learn more.

ABB drive efficiency, safety and productivity in utilities, industry, transport and infrastructure globally. With a heritage spanning more than 130 years, ABB operates in more than 100 countries and employs around 132,000 people. <http://new.abb.com>, <http://www.synerleap.com>
