

Buyer profile: E.ON

After the spin-off of Uniper, which continues to provide classic large scale energy generation and supply services, the new E.ON's strategy focuses on Renewables, Energy networks and Customer solutions.

For this event, E.ON is primarily looking for commercial SME companies with offerings in the following areas; customer-centric energy solutions for B2B and B2C (such as smart homes, smart heating services, e-mobility), large-scale heat production and distribution (solutions for efficiency and digitalisation), and solutions for the smart grid (such as voltage quality, sensors, smart metering and condition based maintenance).

E.ON is represented by Lars Bierlein at the Nordic Business Innovation team, with direct links to the global business. Depending on the SME profiles, E.ON representatives with specific interest areas may join.

E.ON is one of the world's largest privately-owned energy suppliers with 43,000 employees, operating in over 30 countries and serving over 33 million customers. It is one of the 30 members of the DAX stock index of major German companies and a member of the Global Titans 50 index. <http://www.eon.com/en/about-us.html>
