

# Interreg

## North Sea Region SEEV4-City

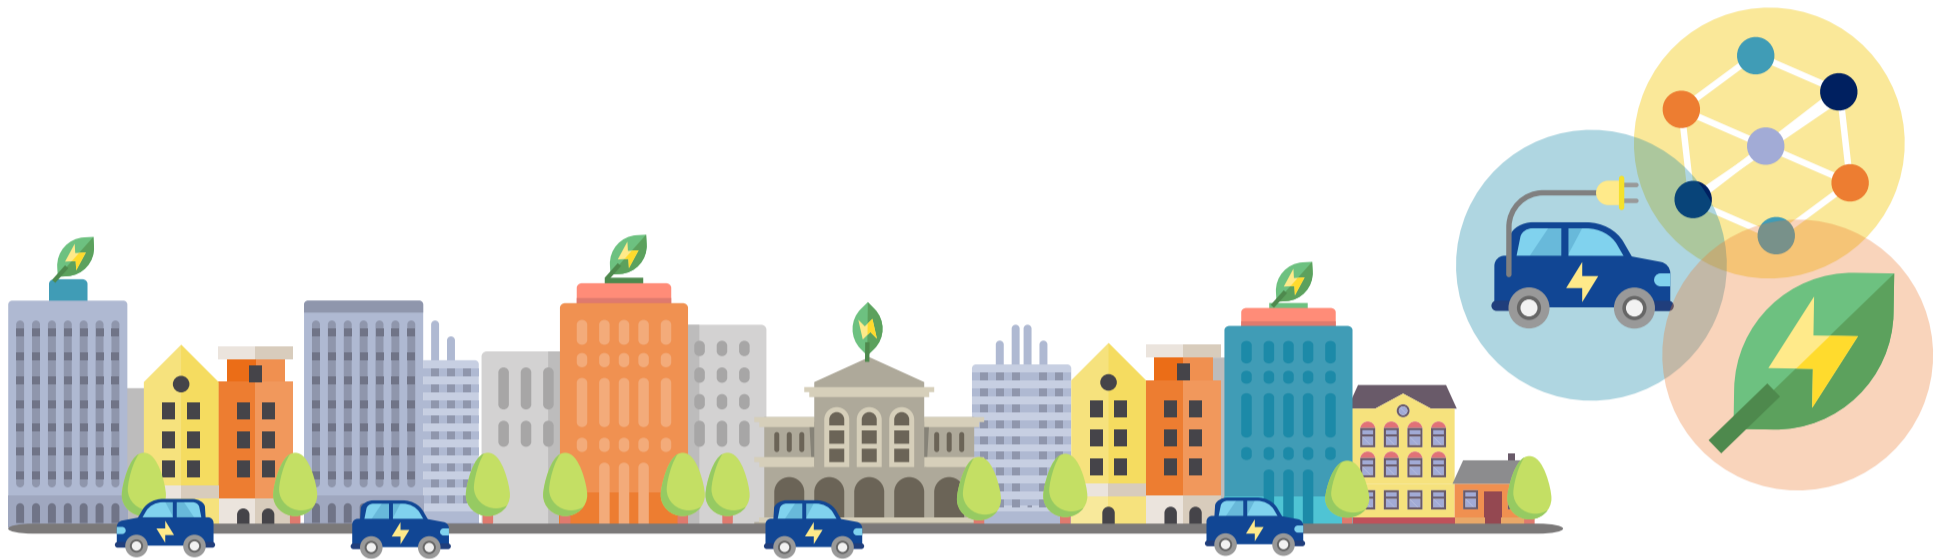

European Regional Development Fund

Priority 4: Promoting green transport and mobility

## Smart, clean Energy and Electric Vehicles for the City

The SEEV4-City project aims to make a huge step forward in **green city development** by a smart combination of electric vehicles, renewable energy sources and ICT solutions.

7 operational, long term pilots in 6 European cities aiming for:

- an increase in *energy autonomy*,
- an increase of *ultra-low emission kilometres*,
- avoiding extra investments to *make existing electrical grids compatible* with an increase in electro mobility and local energy production.

The project results will be a **key enabler for:**

- *innovative city development* integrating clean electric transport services and renewable energy generation,
- the *introduction of new businesses* for renewable energy and ultra-low emission mobility services,
- the *combination* of sustainable mobility and renewable energy in city development planning.

Supported by Interreg VB North Sea Region Programme

- Total budget: € 5.013.573
- ERDF grant: € 2.156.787
- Norwegian funding: € 350.000
- Duration: 01/09/2016 - 25/10/2019
