

INTERVENTION LOGIC

This presentation covers:

1. Intervention logic – why?
2. Intervention logic – how?

3. Intervention logic is helpful!

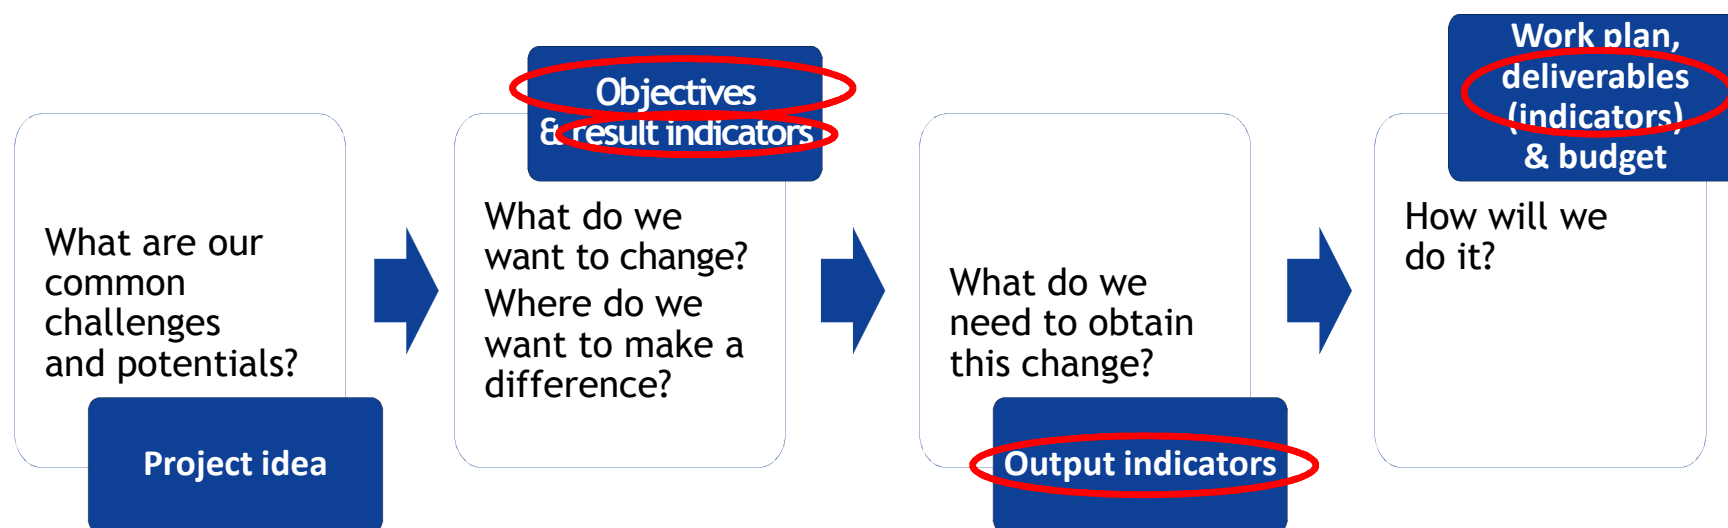

How to develop a comprehensive project design?

Intervention logic from applicant side

Project objectives

1 overall objective

(relates to the strategic aspect of the project and provides the overall context)

several detailed objectives

(describes which steps need to be taken in order to reach the overall objective)

Indicators – what and how many?

Deliverables

- 6-8 per work package

Outputs

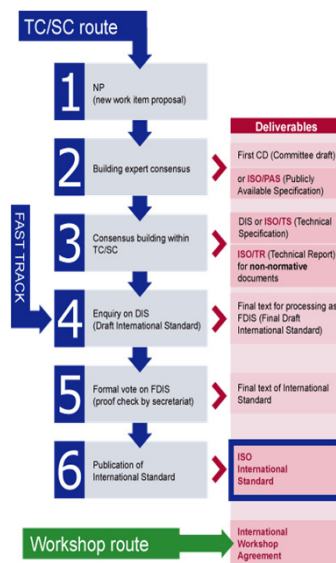

- 5

Results

- 2-3

Deliverables

Priorities and specific objectives

Priority 1
Innovation

1.1

1.2

1.3

Priority 2
Eco-
innovation

2.1

2.2

Priority 3
Sustainable
NSR

3.1

3.2

Priority 4
Transport

4.1

4.2

Output indicators

1 output indicator that is linked to the specific objective of the priority you apply under

+ 4 further output indicators, the same for each project

➡ You have to define targets for each output indicators.

Project results

- **Main message:**
Results are the value derived from delivering on your output indicator!
- Measures the benefit which can be attributed to carrying out your project
- Need to be achievable within the project lifetime.

Project results - examples

1. Reduction in heavy metals in harbour sediments (copper, mercury and lead) by 50%
2. Reduction in CO2 emission...etc.

How?

Indicators in relation to
each other

Project objectives ...and programme objectives

Programme specific objective

Overall project objective

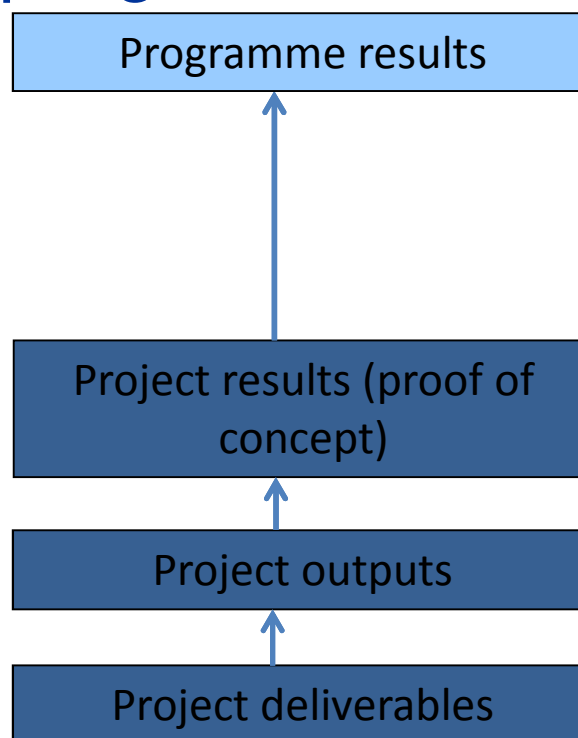

Detailed project objectives

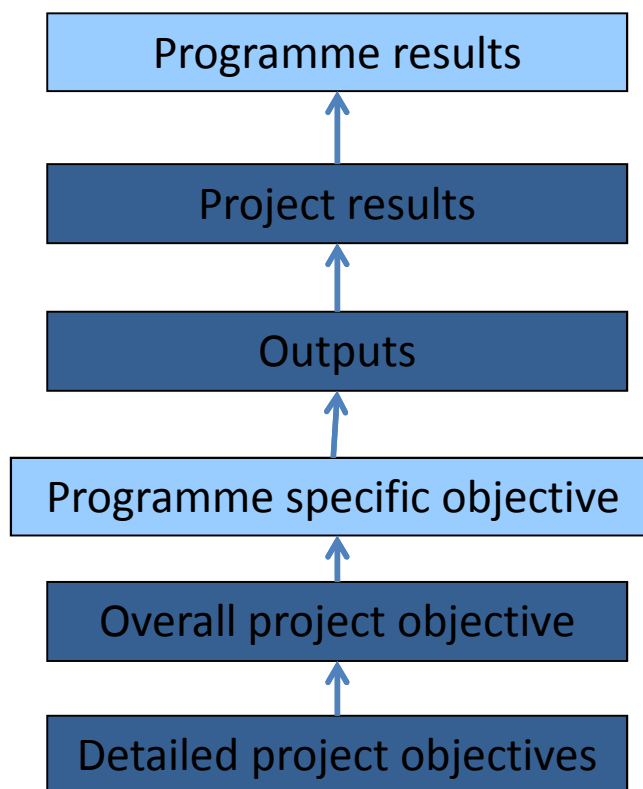

Project indicators ...and programme results
