

Priority 3: Sustainable North Sea Region:
Protecting against climate change and
preserving the environment

IMMERSE IMplementing MEasuRes for
Sustainable Estuaries

Project period: Oct. 2018 - Sept. 2021

Total budget 3.764.138 € |
ERDF contribution 1.882.069 €

The aim of IMMERSE is to improve the quality of estuary management measures by using transnational knowledge and to increase stakeholder support. 11 project partners from across the North Sea Region will explore, develop, test and implement a wide range of measures, focusing particularly on transnational cooperation and stakeholder integration. Three expert groups will develop key recommendations for estuary management, focusing on environment and nature development, human activities, and governance.
